Why M School at Your School ?

M SCHOOL is a comprehensive and fully integrated School Management System offering a flexible, reliable, and cost-effective solution for administering and managing schools.

By Implementing M School:

School can save precious time of teachers, administration, management and IT team and helps in making quick and right decisions.

Onetime data entry and readily available MIS reports for respective stake holders. This avoids using different applications, multiple data entry, multiple login and processing data in spread sheets.
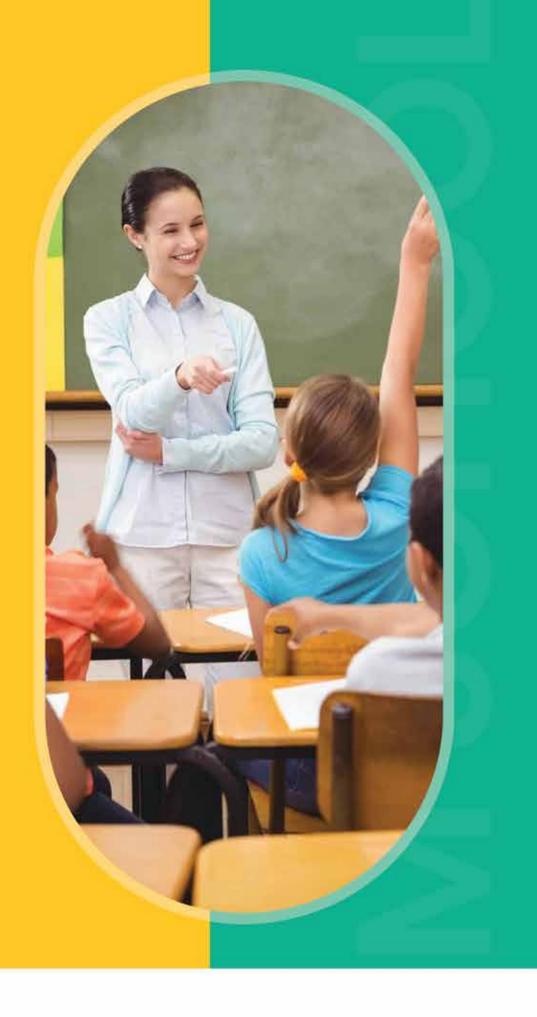

Upon full deployment in a typical operational school, there can be a cost saving of up to 38.6% YoY, as our licensing model covers the entire school functioning end to end including Back office and Payroll modules. A case study would be a school with several libraries. Typical Library Management system would need separate licensing for each library. Our ERP can operate all libraries without dependency on any additional licensing.

Enhancing Teaching and Learning Outcomes Through Data Utilization: Leveraging data to drive improvements in educational effectiveness and student performance.

Ensuring a Cohesive Experience for All Stakeholders: Creating a smooth and integrated experience for everyone involved in the educational ecosystem.

Full fledged Fee management and payment gateway integration to collect fee online which helps Schools to track fee collection and avoid any delay and financial loss.

In built Backoffice modules for finance management and integration with major industry leading finance management solutions like MS Business Central.

Testimonial

I have been acquainted with the team behind M School since 2001. They implemented the first school management ERP for us at the outset of our operations, and we have continued to use the application, with regular technological updates, in our schools.

Their commitment to customer satisfaction and their history of delivering high-quality, cost-effective solutions have allowed us to streamline our daily operations, enhancing efficiency and reducing costs.

Our partnership with the M School team is marked by their reliability, commitment, and ingenuity. I would whole-heartedly recommend them to organizations interested in a lasting association.

Saji Kumar Ampotty,
IT Manager, Emirates International School, Meadows, Dubai

CURRENT LIST OF FEATURES AVAILABLE AND MORE
PLANNED FOR FUTURE RELEASES!
